until the recent political shift pushed workers back into the media spotlight the mainstream

media had largely ignored this significant part of american society in favor of the moneyed upscale consumer for more than four decades christopher r martin now reveals why and how the media lost sight of the american working class and the effects of it doing so the damning indictment of the mainstream media that flows through no longer newsworthy is a wakeup call about the critical role of the media in telling news stories about labor unions workers and working class readers as martin charts the decline of labor reporting from the late 1960s onwards he reveals the shift in news coverage as the mainstream media abandoned labor in favor of consumer and business interests when newspapers especially wrote off working class readers as useless for their business model the american worker became invisible in no longer newsworthy martin covers this shift in focus the loss of political voice for the working class and the emergence of a more conservative media in the form of christian television talk radio fox news and conservative websites now with our fractured society and news media martin offers the mainstream media recommendations for how to push back against right wing media and once again embrace the working class as critical to its audience and its democratic function

the presence of turbulence in multiple areas of our society food fuel and finances being but three critical areas presently being impacted means that long held assumptions are no longer true that the past is not prologue and that the future is not clear and enter into this unstable present the discipline of evaluation a discipline formed and shaped in the past fifty years of stability little turbulence and strong assumptions that everything will go according to plan if things do not go well it is because of either a poor theory of change on how to bring about positive outcomes or weak efforts at implementation it is not because of the stormy present upsetting our quiet past as it is conventional evaluation behavior and beliefs are ill suited for these times the transformational nature of the arab spring is just one arena in which it is clear that a business as usual approach to evaluation is entirely inappropriate the papers in this volume are from the 2011 global assembly of the international development evaluation association ideas nearly 350 development evaluators from eighty five countries came together in amman jordan to discuss and analyze the consequences of turbulence on evaluation the intent of these papers is to systematically assess what changes have come during this time of turbulence and how these changes are impacting the craft of development evaluation to be clear this book is not about how to assess the impacts of crises on development and on people s lives it is about the meaning of a changed world and changed assumptions on the concepts and methods used in evaluation

a novel and scientific approach to creating transformative social change and the surprising ways that each of us can help make a real difference changing the world is difficult one reason is that the most important problems like climate change racism and poverty are structural they emerge from our collective practices laws economies history culture norms and built environments the dilemma is that there is no way to make structural change without individual people making different more structure facing decisions in somebody should do something michael brownstein alex madva and daniel kelly show us how we can connect our personal choices to structural change and why individual choices matter though not in the way people usually think the authors paint a new picture of how social change happens arguing that our most powerful personal choices are those that springboard us into working together with others warehouse worker chris smalls s unionization at amazon is one powerful example taking inspiration from the writer bill mckibben they stress how one important thing an individual can do is be somewhat less of an individual organized into three main parts the book first diagnoses the problem of either or thinking about social change which stems from the false choice of making better personal choices or changing the system then it offers a different way to think about social change anchored in a new picture of human nature emerging across the social sciences finally the authors explore ways of putting this picture into practice neither a how to manual nor an activist s guide somebody should do something pairs stories with science plus some jokes to help readers recognize their own power turning resignation about climate change and racial injustice into actions that transform the world
